
Features

Smartaccess NG is a highly affordable “Kiosk”-System designed specifically for the needs of Hostels. It offers the following functionality::

- It prevents unwanted access to the PC.
- A freely configurable set of URLs may be accessed free of charge
- Authenticated users may visit all Internet Addresses (URLs). However, Smartaccess NG ensures that users...
 - ...do not download any files whatsoever.
 - ...do not save their documents on the PC
 - ...do not install any software, viruses, keyloggers or other malicious content.
 - ...do not use software they brought along.
- Smartaccess NG offers several authentication methods (smartcard, netbooking)
- Smartaccess NG uses Mozilla technology, making it more secure than comparable systems based on Microsoft’s Internet Explorer
- Smartaccess NG can flawlessly display over 99% of internet content.- other Kiosk solutions using a custom browser can display far less.
- Smartaccess NG runs in a standard Windows XP environment.
- The startpage can be freely configured to match the corporate design.
- There are two different remuneration schemes available. Own smartaccess or simply lease it.

Restrictions

- Needs Windows XP (home or professional)
- Does not prevent attacks that exploit OS Vulnerabilities or accessible hardware.
